

JATIN AGRAWAL

Bharatpur, Rajasthan

6350378500 | agrawaljatin405@gmail.com | LinkedIn | GitHub

Summary

Analytical and detail-oriented aspiring Data Scientist with hands-on experience in building machine learning models while analyzing real-world datasets. Skilled in Python, SQL, and core ML techniques, with a focus on data preprocessing, feature engineering, and model evaluation. Passionate about extracting insights and solving practical problems using data.

Education

The LNM Institute of Information Technology, Jaipur, Rajasthan

Expected May 2027

Bachelor of Technology – Mechanical and Mechatronics Engineering

CGPA: 8.86/10

Technical Skills

Languages: C, Python, SQL

Libraries & Frameworks: Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn, Streamlit, FastAPI

Technologies: Machine Learning, Deep Learning, NLP, CI/CD

Tools: Git, Docker, Postman, VS Code, PyCharm, Colab, Anaconda

Coursework: Data Analytics, Data Structures & Algorithms, Object-Oriented Programming, DBMS

Coding Profiles: Solved 400+ DSA problems on [GeeksforGeeks](#) and [LeetCode](#)

Experience

The LNM Institute of Information Technology, Jaipur ([Link](#))

Jan 2026 – Apr 2026

Teaching Assistant – Introduction to Scripting Languages

- Mentored 80+ students in Python, Bash scripting, and machine learning fundamentals, with emphasis on data handling.
- Explained data cleaning, data visualization, core Python libraries, and tools like Jupyter Notebook and Google Colab.

The LNM Institute of Information Technology, Jaipur ([Link](#))

Aug 2024 – Dec 2024

Teaching Assistant – Basic Electronics

- Mentored 60+ students in hands-on electronics lab experiments, clarifying core circuit concepts to improve lab outcomes.

Projects

Zero-Shot Emotion Detection | *Python, NLP, Deep Learning*

Jan 2026

- Developing a zero-shot emotion detection system using semantic text embeddings to classify unseen emotion categories.
- Training a neural similarity model using embeddings to capture relationships between text inputs and emotion labels

Aadhaar Enrollment Analytics Dashboard ([Link](#)) | *Python, Pandas, Streamlit*

Jan 2026

- Built a **coverage-aware analytics dashboard** to correct reporting gaps and geographic inconsistencies across regions.
- Showed enrollment spikes were driven by **reporting behavior** rather than actual citizen demand patterns across states.

YouTube Comment Analysis Chrome Plugin ([Link](#)) | *Python, Flask, MLflow, DVC, Docker, AWS*

Dec 2025

- Implemented an **end-to-end MLOps pipeline** covering experiment tracking, data versioning, and workflow automation.
- Containerized the system with **Docker** and deployed it on an **AWS EC2 instance** for stable and smooth execution.

Inventory Sales Dashboard ([Link](#)) | *Python, MySQL, Streamlit, Docker*

Sep 2025

- Designed a Dockerized **Streamlit inventory dashboard** enabling non-technical users to manage and analyze sales data.
- Implemented stored procedures, business logic, and interactive UI workflows for reorders, stock updates, and reporting.

Certifications

- **Oracle Cloud Infrastructure 2025** – Oracle ([Link](#))
- **Postman API Fundamentals Expert Certification** – Postman ([Link](#))

Extracurricular

Clubs: ASME LNMIIT, PLINTH LNMIIT, SANKALP LNMIIT

Sports: Cricket, Table Tennis, Squash
